From 24 march 2019 first lockdown started teaching, learning and classroom activity is stop. Initially we were in great fear of this pandemic. But as we say education has a solution to all our troubles. In such corona crisis everyone was in tense how to tackle our daily work. Our institution became a corona care centre. Initially their was fear in mind that how to work in such situations. Later every one who are associated with the institution came forward to fight with corona. Our every faculty at corona care centre as corona warrior. Under the proper guidance of Sub District Hospital Mul every one was about necessary precaution while performing duty at corona care centre. Not only teachers our NSS volunteers did best in their villages. With the proper guidance by NSS programme officers NSS volunteers along with their teacher provided essentials to villagers during the lockdown period. Chiroli, Kantapeth, Kelzar are same of the villages where our volunteers provided essentials to villagers. In complete lockdown situation when covid positive case is found at that time whole village used to seal for same days. In such cases senior citizen were in great trouble. Our NSS volunteers guide them properly about sanitization and provided them daily essentials. As we know fear was greater than the causes of covid19. In such situation consolation is very necessary. And our faculty member and volunteers did the same. Till that there is corona care centre in our college and simultaneously college performing its daily activity efficiently. We look very forward very positively and if any on unusual in coming days our college is ready to tackle any situation as such.

BEST PRACTICE - 02 TITLE :- Planting karanj Tress It is true that now a days we are running behind renewable resources. Our college is not exceptional for this. Every year we run many activities in the academic year 2019-20 we plant 200 karanj tress on our college campus. As we know karanj tree should be planted 2 x 2 m or 5 x 5 spacing. We did this work with the help of NSS and NCC volunteers. Karanj tree is not eaten by grazing cattles. And the most importance of this tress is we can used its oil as fuel. In future as trees will grow we have plan to sell seeds in respective market. Karanj tree has multiple uses. It seeds are used as insecticides. There are many more advantages of this tree. Its roots go longer in the earth which helps to maintain water level. So planting these trees we are adopted the renewable resources which is helpful for all and better for future. So this activity run by the college can be recognized as best practice of the academic year 2019-20.
